# Mayaa World

*development through education*

**Giving each child  
the chance of a better life  
through education**

## WHO WE ARE

Mayaa Hong Kong is a government recognized charity that traces its origins back to 2011 and the creation of Mayaa Nepal. The latest chapter in a long history of charitable endeavours set up by **Nicole Sicard**, a retired biology

teacher who has spent her life educating children in Hong Kong and elsewhere. Our aim is to help children achieve a better standard of living through education. With a team of **8** people including **social workers** and **medical** staff in our dedicated centre in Nepal, we are now developing these actions in **Hong Kong**.

## EDUCATION

Our **main focus**. For families who have trouble feeding themselves, this is a secondary option. Our social workers identify families in the direst need and offer to provide the extras needed for the children to go to school; uniforms, books, stationary. We currently support **300** children in Nepal and **100** in Hong Kong.

## HEALTH

Mayaa Nepal organises monthly health camps in some of the poorest districts of Kathmandu. Free and open to all, these are run by a doctor, a dentist or a gynaecologist. Up to **500** people attend each session meaning we treat up to

**4000** people each year, often identifying illnesses that can be treated before they become chronic.

## KINDERGARTEN

So that older siblings can attend school and allowing the **mothers** to go out to work, we have set up kindergartens. Run by one of our social workers it currently has some **40** children. These children are already autonomous, and can

start learning in a safe and clean environment, where we provide them with a daily **nutritious meal**.

## FAMILY SUPPORT

Our social workers work closely in the community **identifying** families most in need. But they also educate, covering subjects such as basic **hygiene**, money management, the dangers of alcohol and drug abuse as well as prevention

of **domestic violence**.
